FOREWORD

This bibliography is a selected listing of approximately 730 books, monographs, journal articles, festschriften, bibliographies, and unpublished papers on linguistics and the uncommonly taught languages. About 50 linguistic serial and journal publications are covered. Articles from foreign literature, with few exceptions, are not included unless written in English. With the exception of a few earlier significant works, and some 1967 publications, all entries were published in 1966. Also included are 113 documents which have been or will soon be entered in the ERIC system. For the purpose of identification and reference, the ERIC documents have been provided with a Clearinghouse accession number (e.g. AL000093). Some works on the commonly taught languages, viz., English, French, Spanish, Italian, German, and Russian, have been included for their theoretical significance, or because they are being entered in the ERIC system.

In general format and abbreviations, this bibliography follows the new Style Sheet for the MLA International Bibliography. Accordingly, the year of publication for 1966 works has been left out since the bibliography carries the date in its title. Dates are given for works published or released before or after 1966.

I would like to acknowledge the generous assistance of the entire staff of the ERIC Clearinghouse for Linguistics in the preparation of this bibliography and to thank, especially, Miss Purita Ibanez for typing it.
